Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).**

### 15.67.2 Built form standards – Commercial Banks Peninsula Zone

**Advice note:** There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).

There are no prohibited activities.

### 15.910.2 Built form standards – ~~Commercial~~ Mixed Use Zone

**Advice note: There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).**

**Advice note:** There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).

## 15.1112.2 Built form standards — Commercial Central City Mixed Use Zone

**Advice note:** There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).

**Advice note: There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering**

development should, at an early stage, seek information on infrastructure capacity from [Council's Three Waters Unit](#). Please contact the [Council's Three Waters Unit](#) at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).

### **15.1314.2.6 ~~Commercial Central City Business~~ City Centre and Central City Mixed Use Zones urban design**

- a. The extent to which the **building** or use:
- i. recognises and reinforces the context of a **site**, having regard to the identified urban form for the ~~Commercial Central City Business~~ **City Centre** Zone, the grid and diagonal street pattern, natural, heritage or cultural assets, and **public open spaces**;
  - ii. in having regard to the relationship of Ngāi Tūāhuriri/ Ngāi Tahu with Ōtautahi as a cultural element, consideration should be given to **landscaping**, the use of Te Reo Maori, design features, the use of locally sourced materials, and low impact design principles as is appropriate to the context;
  - iii. in respect of that part of the **building** or use visible from a publicly owned and **accessible** space, promotes active engagement with the street, community safety, **human scale** and visual interest;
  - iv. takes account of nearby buildings in respect of the exterior design, materials, architectural form, scale and detailing of the building;
  - v. is designed to emphasise the street corner (if on a **corner site**);
  - vi. is designed to incorporate **Crime Prevention Through Environmental Design** (CPTED) principles, including encouraging surveillance, effective lighting, management of public areas and **boundary** demarcation; and
  - vii. incorporates **landscaping** or other means to provide for increased amenity, shade and weather protection.
  - viii. For **buildings** or parts of buildings over 30m in height, considers the adverse impacts of wind caused by tall buildings on the safety and comfort of people, whether stationary or moving, at **street level** and in **public spaces** including Cathedral Square, Victoria Square, the Otākaro Avon River Corridor, the Margaret Mahy Family Playground, any public open space zoned Open Space Community Park Zone, **Central City Heritage Triangles** and other parks, and any mitigation measures proposed, demonstrated through the use of wind modelling and analysis.
  - ix. For **buildings** or parts of buildings over 28m in height, the proposal will need to demonstrate (in addition to the above matters):
    - a. A clear design approach to the proposed **building** form, including a coherent relationship between the **building base** and **building tower** elements to ensure graceful design solutions and avoiding overly bulky and dominant building forms. The proposed building shall demonstrate how the height and massing is visually mitigated through the overall design of the building. Massing is the combined effect of the height, bulk and silhouette of a building. In general, bulky, dominant massing of new tall buildings should be avoided. The building form/massing should be influenced by the site's location, the use of the building and its status,

and its contribution within the wider urban context, for example as a landmark focus or as a response to other established taller buildings.

- b. An elegant design approach for the top of the building including the accommodation of rooftop plant and service apparatus and telecommunication masts that contributes positively to the enhancement of the city skyline, particularly from strategic viewpoints and areas where there are high levels of pedestrian activity.
- c. High architectural quality through the composition of design elements, articulation and modulation of the building facades, colours & materials, glazing and other architectural detailing. Note that large blank walls / facades should be avoided in the tower element of the building. External materials will need to be durable, require low maintenance and perform well from an environmental sustainability perspective.
- d. An integrated and coherent design approach for the building's signage, lighting and night-time appearance, noting that lighting is a key design consideration and can greatly impact on the building's appearance on long and near views. Also note that large scale advertisements at high levels are not supported.
- e. How the building mitigates the individual or cumulative effects of shading, visual bulk and dominance, glare and reflections and reflected heat from glass on sites in adjoining residential zones or on the character, quality and use of public open space and in particular the Ōtākaro Avon River corridor, Earthquake Memorial, Victoria Square, Latimer Square and Cathedral Square.

Advice Note:

- For the purpose of this assessment, safety and comfort will be demonstrated where the building does not result in wind conditions that exceed the following cumulative wind condition standards (Gust Equivalent Mean) more than 5% annually at ground level, within 100m of the site based on modelling:
  - i. 4 m/s at the boundary of the site street frontage for the width of the footpath;
  - ii. 6 m/s within any carriageway adjacent to the site;
  - iii. 4 m/s at the following listed public open spaces:
    - A. The Avon River Precinct Zone;
    - B. Cathedral Square;
    - C. Victoria Square;
    - D. Any public open space zoned Open Space Community Park Zone;
    - E. The Margaret Mahy Family Playground.
- New buildings, structures or additions greater than 30 metres in height shall not result in wind speeds exceeding 15m/s more than 0.3% annually at ground level.

**15.1314.2.7 ~~Commercial Central City Business Zone~~ City Centre Zone - Retail Precinct**

- a. The extent to which the proposal achieves the following matters:

- ii. north and south pedestrian connections through street blocks, ideally with two such connections within each of the larger street blocks, distributed to facilitate convenient and accessible connectivity through blocks;
- iii. car parking, access and servicing arrangements integrated to achieve shared access point(s) to avoid unnecessary crossings in an otherwise continuous building façade and minimise pedestrian conflict;
