14.5.1.6 Prohibited activities

There are no prohibited activities.

14.5.2 Built form standards

NOTE: None of the medium density residential standards (MDRS) are in immediate legal effect as the Council has proposed a sunlight access qualifying matter that applies to all of the medium and high density residential zones (see section 86BA(1)(c)(ii) of the Resource Management Act 1991). They will not be in legal effect until after an IHP hearing and recommendation by the IHP to Council on those rules.

NB: This advice note should be removed prior to the sub-chapter becoming operative.

~~a. The following built form standards shall be met by all permitted activities and restricted discretionary activities RD1, unless otherwise stated.~~

Advice Notes:

1. There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at WastewaterCapacity@ccc.govt.nz, WaterCapacity@ccc.govt.nz and Stormwater.Approvals@ccc.govt.nz.
2. Reference should be made to 6.1A for qualifying matters that may apply further restrictions to development.
3. Any retirement village activity shall instead be considered under 14.4.2 or 14.12.2 as they would apply under operative controls as at 16 March 2023.

14.5.2.1 Site density and servicing

Advice Notes:

1. There is no **site** density standard in the ~~Residential~~ Medium Density **Residential** Zone, except as detailed under 14.5.3 – Area Specific Standards.

Advice note:

1. **In addition to these rules, the tree canopy cover and financial contributions requirements in Chapter 6.10A apply to residential development in residential zones resulting in one or more residential units, except where (c) or (d) applies.**
 - ~~c. For single and/or multi residential unit developments, a minimum tree canopy cover of 20% of the development site area must be provided in accordance with the Chapter 6.10A rules. The tree canopy cover planting area may be combined with the landscaping area in whole or in part, may be located on any part of the development site, and does not have to be associated with each residential unit.~~
 - ~~d. An additional tree canopy cover equivalent to 15% of the road corridor area must be provided in the road corridor in a new greenfield residential subdivision and/or development, or a brownfield site subject to comprehensive residential development where new roads have been / will be created, as specified in the Chapter 6.10A rules.~~
 - ~~e. Where the tree canopy cover area is not achieved in full or in part through retaining existing trees and/or planting new trees, the remaining tree canopy cover requirement will be subject to the payment of financial contributions in lieu of tree planting, as specified in the Chapter 6.10A rules.~~

No part of any building shall project beyond a building envelope constructed by recession planes shown in Appendix 14.16.2 diagram D from points 3m above ground level along all boundaries where the boundary forms part of a legal right of way, entrance strip, access site, or pedestrian access way, the height in relation to boundary applies from the farthest boundary of that legal right of way, entrance strip, access site, or pedestrian access way.

b. This standard does not apply to—

i. a boundary with a road:

ii. existing or proposed internal boundaries within a site:

iii. site boundaries where there is an existing common wall between 2 buildings on adjacent sites or where a common wall is proposed:

iv. within the Local Centre Intensification Precinct:

A. the construction of three or more residential units of a maximum of 14 metres in height from ground level, to any part of a building:

1. along the first 20 metres of a side boundary measured from the road boundary; or

2. within 60% of the site depth, measured from the road boundary, whichever is lesser. For corner sites, depth is measured from the internal boundaries, that are perpendicular to the road boundary. See Figure 1, below.

B. for any part of a building above 12m in height, the recession plane under a. shall apply, unless that part of the building above 12m in height is set back from the relevant boundary of a development site as set out below:

1. northern boundary: 6 metres;

2. southern boundary: 8 metres; and

3. eastern and western boundaries: 7 metres

where the **boundary** orientation is as identified in Appendix 14.16.2 Diagram D, in which case there shall be no recession plane requirement for that part of the **building** above 12m in **height**.

- a. ~~Buildings~~, shall not project beyond a ~~building~~ envelope constructed by recession planes, as shown in, [Appendix 14.16.2](#) diagram C, from points 2.3 metres above:
 - i. ~~ground level~~ at the internal ~~boundaries~~; or
 - ii. where an internal ~~boundary~~ of a ~~site~~ abuts an ~~access~~ lot or ~~access~~ strip the recession plane may be constructed from points 2.3 metres above ~~ground level~~ at the furthest ~~boundary~~ of the ~~access~~ lot or ~~access~~ strip or any combination of these areas; or
 - iii. where ~~buildings~~ on ~~adjoining~~ sites have a common wall along an internal ~~boundary~~ the recession planes shall not apply along that part of the ~~boundary~~ covered by such a wall.
- b. Where the ~~building~~ is located in an overlay that has a permitted ~~height~~ of 11 metres or more, the recession plane measurement shall commence from points 2.3 metres above ~~ground level~~ at the internal ~~boundaries~~ and continue on the appropriate angle to points 11 metres above ~~ground level~~, at which point the recession plane becomes vertical.
- c. Where the ~~building~~ is located in a ~~Flood Management Area~~, the exemptions in Rule 5.4.1.3 apply (for activities P1-P4 in Table 5.4.1.1b).
- d. Except that:
 - i. In the Residential Medium Density Zone Higher Height Limit Overlay, the recession plane shall be as shown in [Appendix 14.16.2](#) diagram D, unless the height of the ~~building~~ is greater than 11 metres, in which case refer to diagram E.
 - ii. In the Residential Medium Density Lower Height Limit Overlay, the recession plane shall be as shown in [Appendix 14.16.2](#) diagram B.

Advice note:
