

## DISTRICT PLAN TEXT AMENDMENTS

KEY:

### 1. Text Amendments as Notified by Council and included in Proposed Plan Change 14

Text in **bold red underlined** is that from Schedule 3A of the Resource Management Act and must be included.

For the purposes of this plan change any unchanged text is shown as normal text or in bold, any text proposed to be added by the plan change as notified is shown as **bold underlined** and text to be deleted as ~~bold strikethrough~~.

Text in **green** font identifies existing terms defined in *Chapter 2 – Definitions*.

Where the proposed plan change contains a term defined in *Chapter 2 – Definitions*, the term is shown as **bold underlined text in green** and the wording to be deleted is shown as ~~bold strikethrough in green~~. New definitions in Chapter 2 and within a provision (including a rule) is shown as **bold green text underlined in black**.

Text in **blue** font indicates existing links to other provisions in the District Plan and/or external documents. These will have pop-ups and links, respectively, in the on-line Christchurch District Plan. Where the proposed plan change contains a new link, it is shown as **bold underlined text in blue**. Where a link is proposed to be deleted, it is shown as ~~bold strikethrough in blue~~.

### 2. Changes recommended by the Independent Hearings Panel

The changes recommended by the Independent Hearings Panel are based on Council's 'Reply Provisions' version, which include:

- Text recommended to be added/deleted by proposed PC14
- Text recommended to be added/deleted within s42A reports.
- Text recommended to be added/deleted from expert conferencing/joint witness statements.
- Text recommended to be added/deleted within s42A reports in response to matters raised during Hearings.

Where the Independent Hearings Panel recommends that the proposed PC14 provision be accepted the text is changed to **bold underlined** for the added text, and changes to ~~bold strikethrough~~ for text to be deleted.

Where the Independent Hearings Panel recommends that **green** definitions or the **blue** links to other provisions and/or external documents are accepted they *remain* unchanged.

Changes recommended by the Independent Hearings Panel (including to proposed PC14 provisions, definitions and links) are shown as **bold underlined** for text in the Council's 'Reply Provisions' that are recommended to be accepted or for additional new text, and ~~bold deleted~~ for text to be deleted (ie the purple and orange colours in the Council's 'Reply Provisions' have been removed).

### 3. Further Instructions and Explanations for Council

- a. The Panel findings and evaluations with respect to MRZ and HRZ objectives, policies and standards are that those provisions apply only to our Recommended Pathway B and C. To the extent the

Reply or submissions apply to Pathway A enablements, the Panel has recommend that the changes are rejected, and the Council reverts to the relevant status quo objectives, policies and standards. The Panel recommendation is for Council to consider the 'Three Pathway' approach. Due to the complex nature of 'unpicking' the provisions that would apply to each pathway, the Residential High Density Zone provisions have not been updated with the Panel's recommendations in this regard.

- b. The Residential High Density Zone provisions have been updated with the Panel's other recommendations where it is considered they do not impact on the 'Three Pathway' approach set out in a. above (such as deletion of precincts and qualifying matters, provisions that are more enabling and additions).
- c. There are no further instructions or explanations.

### 14.6.1.6 Prohibited activities

There are no prohibited activities.

*NOTE: None of the medium density residential standards (MDRS) are in immediate legal effect as the Council has proposed a sunlight access qualifying matter that applies to all of the medium and high density residential zones (see section 88BA(1)(c)(ii) of the Resource Management Act 1991). They will not be in legal effect until after an IHP hearing and recommendation by the IHP to Council on those rules.*

*NB: This advice note should be removed prior to the sub-chapter becoming operative.*

### 14.6.2 Built form standards

- ~~a. The following built form standards shall be met by all permitted activities and restricted discretionary activities RD2, unless otherwise stated.~~

#### Advice note:

1. There is no spare, or limited, wastewater, storm water, or water supply infrastructure capacity in some areas of Christchurch City which may create difficulties in granting a building consent for some developments. Alternative means of providing for those services may be limited or not available. Compliance with the District Plan does not guarantee that connection to the Council's reticulated infrastructure is available or will be approved. Connection to the Council's reticulated infrastructure requires separate formal approval from the Council. There is a possibility that approval to connect will be declined, or development may trigger the need for infrastructure upgrades or alternative servicing at the developer's cost. Anyone considering development should, at an early stage, seek information on infrastructure capacity from Council's Three Waters Unit. Please contact the Council's Three Waters Unit at [WastewaterCapacity@ccc.govt.nz](mailto:WastewaterCapacity@ccc.govt.nz), [WaterCapacity@ccc.govt.nz](mailto:WaterCapacity@ccc.govt.nz) and [Stormwater.Approvals@ccc.govt.nz](mailto:Stormwater.Approvals@ccc.govt.nz).
2. Reference should be made to 6.1A for applicable qualifying matters that may apply further restrictions to development.

#### 14.6.2.1 Building height

- ~~a. Buildings must not exceed 14 metres in height above ground level. The maximum height of any buildings shall be as shown on the Central City Maximum Building Height planning map, except that the Central City Maximum Building Height planning map does not apply to the following land where a maximum building height of 20 metres shall apply to buildings for a retirement village:~~
- ~~i. Lot 1 DP 77997 CT CB46D/74;~~
  - ~~ii. Town Section 118 DP 3780; and~~

- ~~iii. Town Section 119 DP 3780.~~
- ~~b. Residential units shall not be less than 7 metres in height above ground level.~~
- ~~c. Buildings for a residential activity within the Industrial Interface Qualifying Matter Area must not exceed 7 metres in height above ground level or two storey, whichever is the lesser.~~
  - a. Other than where b.v. applies, Buildings must not exceed the following height above ground level:
    - i. 22 14 metres; or
    - ii. 39 metres within the Central City Residential Precinct; or
    - iii. 28-22 metres within the Riccarton Residential Intensification Precinct walkable catchment of the Central City Zone that is not within the Central City Residential Precinct.
  - b. The following standards also apply, except for any Retirement Village:
    - i. For any building exceeding 14 metres in height above ground level:
      - A. any part of the building above 14 metres is set back at least 4 metres from the road boundary.
      - B. A ground level communal outdoor living space shall be provided at a ratio of 50m<sup>2</sup> per 10 residential units. The number of units shall be rounded to the nearest 10, in accordance with the Swedish rounding system. This ratio shall be calculated on the number of residential units on the 4<sup>th</sup> floor of the building and any subsequent floors above, with the maximum required area being 20% of the site area. Any communal outdoor living space shall have a minimum dimension of no less than 8 metres.
    - ii. For any building between 19-22 metres height above ground level (except in the Central City Residential Precinct or for any Retirement Village):
      - A. That part of the building above 19 metres shall be set back a minimum of 2 metres from the highest part of each façade (including balustrades or similar architectural features) at or below 19 metres; or
      - B. the roof shall have a pitch of less than 45 degrees measured from the external walls of the building (excluding eaves and gutters to a maximum combined width of 650mm per wall);
    - iii. For any building between 36-39 metres within the Central City Residential Precinct (except for any Retirement Village):
      - A. That part of the building above 36 metres in height above ground level shall be set back between 2 and 5 metres from the highest part of each

façade (including balustrades or similar architectural features) at or below 36 metres in height above ground level; or

B. the roof shall have a pitch of less than 45 degrees measured from the external walls of the building (excluding eaves and gutters to a maximum combined width of 650mm per wall);

c. Other than where d. applies, Residential units shall not be less than be a minimum of 7 metres in height above ground level or two storeys (not including mezzanine floors), whichever is lesser, when developing three or more residential units.

d. Buildings for residential activity within the Industrial Interface Qualifying Matter Area must not exceed 7.8 metres in height above ground level or two storeys, whichever is the lesser.

#### 14.6.2.2 Daylight recession planes Height in relation to boundary

a. No part of any building below a height of 12 metres shall project beyond a building envelope constructed by recession planes shown in Appendix 14.16.2 Diagram D from points 3 & 4.0 metres, or 4m where specified on the diagram, above ground level along all boundaries. Where the boundary forms part of a legal right of way, entrance strip, access site, or pedestrian access way, the height in relation to boundary applies from the farthest boundary of that legal right of way, entrance strip, access site, or pedestrian access way.

b. For any part of a building above 12 metres in height, the recession plane under a. shall apply, unless that part of the building above 12 metres in height is set back from the relevant boundary of a development site as set out below:

i. northern boundary: 6 metres;

ii. southern boundary: 8 metres; and

iii. eastern and western boundaries: 7 metres

where the boundary orientation is as identified in Appendix 14.16.2 Diagram D, in which case there shall be no recession plane requirement for that part of the building above 12 metres in height.

c. This standard does not apply to—

i. a boundary with a road;

ii. existing or proposed internal boundaries within a site;

iii. site boundaries where there is an existing common wall between 2 buildings on adjacent sites or where a common wall is proposed.

iv. the construction of three or more residential units to of a maximum of 14 metres in height from above ground level, to any part of a building;

- A. along the first 20 metres of a side boundary measured from the road boundary; or
- B. within 60% of the site depth, measured from the road boundary, whichever is lesser. For corner sites, depth is measured from the internal boundaries, that are perpendicular to the road boundary. See Figure 1, below.

except where the boundary is with a site in a residential zone other than HRZ, or an Open Space zone, where iv. A and B shall not apply.

- a. ~~Buildings shall not project beyond a building envelope constructed by recession planes from points 2.3 metres above internal boundaries with other sites as shown in Appendix 14.16.2C, except that:~~
  - i. ~~Where an internal boundary of a site abuts an access lot, access strip, or access to a rear allotment, the recession plane may be constructed from points 2.3 metres above the furthest boundary of the access lot, access strip, or access to a rear allotment or any combination of these areas;~~
  - ii. ~~Where buildings on adjoining sites have a common wall along an internal boundary the recession planes shall not apply along that part of the boundary covered by such a wall.~~
- b. ~~Where the building is located in a Flood Management Area, the exemptions in Rule 5.4.1.3 apply (for activities P1-P4 in Table 5.4.1.1b).~~
- c. ~~The level of internal boundaries shall be measured from filled ground level except where the site on the other side of the internal boundary is at a lower level, then that lower level shall be adopted.~~

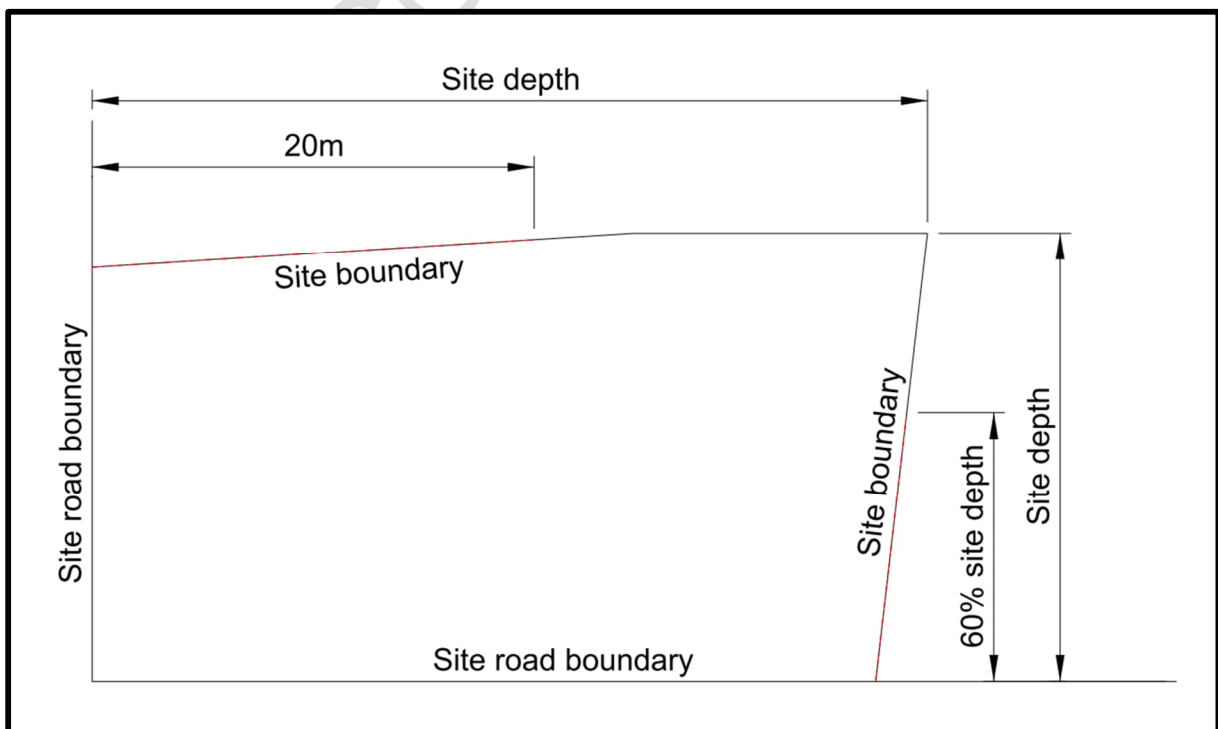

Figure 1: Application of height in relation to boundary exemption for corner sites (14.6.2.2.bc.iv.B)

### 14.6.2.3 ~~Road boundary building~~ Setbacks

- a. Buildings must be set back from the relevant boundary by the minimum depth listed below:
  - i. Front: 1.5 metres
  - ii. Side: 1 metre
  - iii. Rear: 1 metre (excluded on corner sites)
- b. This standard does not apply to site boundaries:
  - i. where there is an existing common wall between 2 buildings on adjacent sites or where a common wall is proposed;
  - ii. For side and rear boundary setbacks: for accessory buildings, or garages that internally access a residential unit, where the accessory building or garage is less than 3 metres in height and the total length of the building does not exceed 10.1m; and
  - iii. For front boundary setbacks: where eaves, and roof overhangs, and gutters, up to 300mm in width and guttering up to 200mm from the wall of a building may intrude into the front boundary setback by a maximum of 650mm (combined measurement); and/or a porch with a maximum width of 1.2m may intrude into the front boundary setback by a maximum of 800mm.
- c. For any retirement village, setback standards only apply to the perimeter boundary of the site or development site for the retirement village.
  - a. ~~For sites fronting Bealey Avenue, buildings shall be setback a minimum of 6 metres from the road boundary of Bealey Avenue;~~
  - b. ~~In the locations indicated as Central City Building Setbacks, on the Central City Active Frontages and Verandas and Building Setback Planning Map, buildings shall be setback a minimum of 4.5 metres from road boundaries;~~
  - c. ~~In all other instances, buildings shall be setback a minimum of 2 metres from road boundaries, except that:~~
    - i. ~~Where a garage has a vehicle door facing a road, the garage door shall be setback a minimum of 4.5 metres unless the garage door projects outward, in which case the garage door shall be setback a minimum of 5.5 metres;~~
    - ii. ~~Where a garage has the vehicle door facing a shared accessway, the garage door shall be setback a minimum of 7 metres measured from the garage door to the furthest formed edge of the adjacent shared access unless the garage door projects outwards, in which case the garage door shall be setback a minimum of 8 metres;~~
    - iii. ~~For street fronting residential units, garages, carports, and other accessory buildings (excluding basement parking areas and swimming pools) shall be located at least 1.2 metres further from the road boundary than the front facade of any ground level habitable space of that residential unit.~~

Advice note: Building setback requirements are further controlled by the Building Code. This includes the provision for firefighter access to buildings and egress from buildings. Plan users should refer to the applicable controls within the Building Code to ensure compliance can be achieved at the building consent stage. Issuance of a resource consent does not imply that waivers of Building Code requirements will be considered/granted.

#### 14.6.2.4 Minimum building setbacks from internal boundaries

- a. ~~Buildings that immediately adjoin an access lot, access strip, or access to a rear site shall be setback a minimum of 1 metres from that part of an internal boundary of a site.~~
- b. ~~Buildings shall be setback a minimum of 1.8 metres from other internal boundaries of a site, except that:~~
  - i. ~~no setback is required from an access lot or access strip on the same site, provided that any windows on the ground floor facing and within 1 metre of the access lot or access strip are non-opening;~~
  - ii. ~~no setback for accessory buildings is required, provided the total length of walls or parts of accessory buildings facing and located within the setback is less than 10.1 metres and/or where the accessory building faces the ground floor window of a habitable space on the adjoining site it shall be setback a minimum of 1.8 metres from that neighbouring window for a minimum length of 2 metres either side of the window;~~
  - iii. ~~no setback is required along that part of an internal boundary where buildings on adjoining sites have a common wall along the internal boundary;~~
  - iv. ~~no setback is required for basements, provided that any part of a basement located within 1.8 metres of an internal boundary is wholly below ground level.~~
- c. ~~Parts of a balcony or any window of a living area at first floor level or above shall not be located within 4 metres of an internal boundary of a site, except that this shall not apply to a window at an angle of 90o or greater to the boundary, or a window or balcony which begins within 1.2 metres of ground level (such as above a garage which is partly below ground level).~~
- d. ~~For the purposes of this rule this excludes guttering up to 200mm in width from the wall of a building.~~

#### 14.6.2.4 Outlook space

- a. An outlook space must be provided for each residential unit as specified in this clause.
- b. An outlook space must be provided from habitable room windows as shown in the diagram below:

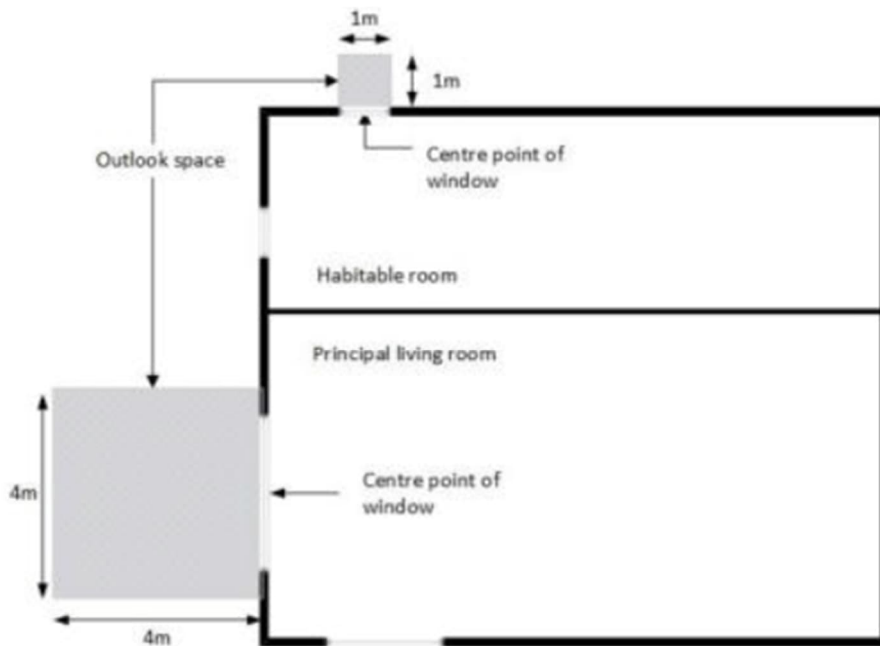

Figure 2: Outlook space

- c. The minimum dimensions for a required outlook space are as follows:
  - i. a principal living room must have an outlook space with a minimum dimension of 4 metres in depth and 4 metres in width; and
  - ii. all other habitable rooms must have an outlook space with a minimum dimension of 1 metre in depth and 1 metre in width.
- d. The width of the outlook space is measured from the centre point of the largest window on the building face to which it applies.
- e. Outlook spaces may be over driveways and footpaths within the site or over a public street or other public open space.
- f. Outlook spaces may overlap where they are on the same wall plane in the case of a multi-storey building.
- g. Outlook spaces may be under or over a balcony.
- h. Outlook spaces required from different rooms within the same building may overlap.
- i. Outlook spaces must—
  - i. be clear and unobstructed by buildings (excluding any doors or windows opening into an outlook space from the principal living room or habitable room); and
  - ii. not extend over an outlook space or outdoor living space required by another dwelling.

#### 14.6.2.5 Building separation

- a. Residential units above 12 metres in height above ground level must be separated from any other residential units above 12 metres in height above ground level on the same development site by at least 10 metres measured horizontally, except where a other than where these buildings are joined by a common wall is included.

## 14.6.2.6 ~~14.6.2.5~~ Fencing and screening

- a. ~~Parking areas~~ shall be screened on internal ~~boundaries~~ by ~~landscaping~~, wall(s), fence(s), or a combination of these to a minimum ~~height~~ of 1.5 metres from any ~~adjoining site~~. Where this screening is by way of ~~landscaping~~ it shall be for a minimum depth of 1.5 metres and the minimum height shall be the minimum height at the time of planting;
- b. ~~Other than for screening of the required area of service space or outdoor living space~~, fences and other screening structures shall not exceed 1 metre in ~~height~~ where they are located either:
- i. ~~within 2 metres of the road boundary~~; or

- e. a. The maximum height above ground level for any fencing shall be:

	<u>Fence location</u>	<u>Fence height standard</u>
i.	<u>road boundary – non-arterial road</u>	<u>50% road boundary width (excluding accessways): 1.58m</u> <u>Remaining road boundary width: 1.0m</u>
ii.	<u>road boundary – arterial road</u>	<u>50% road boundary width (excluding accessways): 1.8m</u> <u>Remaining road boundary width: 1.0m</u>
iii.	<u>Side, rear, and internal boundary (other than where iv. applies)</u>	<u>2.0m</u>
iiiv.	<u>On the boundary with any land zoned Open Space Community Parks, Open Space Water and Margins and Avon River Precinct/Te Papa Ōtākaro</u>	<u>1.0m; or</u> <u>2.0m where the whole fence or screening structure is a minimum of 50% visually transparent.</u>

- b. Any fencing requirements under Rule 14.6.2.11 shall not be in addition to the above standards, unless the required fence height in this rule is less than 1.2m adjacent to the proposed storage area/s.

- i. 1m in height maximum on the boundary with any land zoned Open Space Community Parks Zone, Open Space Water and Margins Zone and Avon River Precinct/Te Papa Ōtākaro Zone, except that the maximum height shall be 2 metres if the whole fence or screening structure is at least 50% transparent.
- c. For the purposes of this rule, a fence or other screening structure is not the exterior wall of a ~~building~~ or ~~accessory building~~.
- d. Any fencing under this rule shall be provided on the site boundary or within the applicable front yard setback from the road boundary.

#### 14.6.2.7 ~~14.6.2.6~~ Tree and garden planting Landscaped area and tree canopy cover

- a. A residential unit at ground floor level must have a landscaped area of a minimum of 20% of a developed site with grass or plants, and can include the canopy of trees regardless of the ground treatment below them.
- b. The landscaped area may be located on any part of the development site, and does not need to be associated with each residential unit.
- c. The 20% landscaped area may be provided as a sum across the site, as long as there is a minimum dimension of 0.6m.

#### ~~Advice note:~~

~~d.1 In addition to these rules, the tree canopy cover and financial contributions requirements in Chapter 6.10A apply to residential development in residential zones resulting in one or more residential units, except where (e-d) applies.~~

~~d. For single and/or multi residential unit developments, a minimum tree canopy cover of 20% of the development site area must be provided in accordance with the Chapter 6.10A rules. The tree canopy cover planting area may be combined with the landscaping area in whole or in part, may be located on any part of the development site, and does not have to be associated with each residential unit.~~

~~e. An additional tree canopy cover equivalent to 15% of the road corridor area must be provided in the road corridor in a new greenfield residential subdivision and/or development, or a brownfield site subject to comprehensive residential development where new roads have been / will be created, as specified in the Chapter 6.10A rules.~~

~~f. Where the tree canopy cover area is not achieved in full or in part through retaining existing trees and/or planting new trees, the remaining tree canopy cover requirement will be subject to the payment of financial contributions in lieu of tree planting, as specified in the Chapter 6.10A rules.~~

~~e.d.g.a.~~ For developments not intended for residential activity, A minimum of 20% of the site shall be provided for landscaping (which may include private or communal open space in residential developments), where

- i. at least 50% of the landscaping shall be trees and shrubs, and
- ii. a minimum of one native tree for every 250m<sup>2</sup> of gross site area (prior to subdivision), or part thereof, is included within the landscaping;
- iii. ~~b.~~ All trees shall be not less than 1.5 metres high at the time of planting;
- iv. ~~e.~~ All trees and landscaping required by this rule shall be maintained and if dead, diseased or damaged, shall be replaced.

#### ~~14.6.2.7~~ Minimum residential unit size

- a. ~~The minimum net floor area (including toilets and bathrooms) for any residential unit (excluding parking areas, garages, or balconies allocated to each unit) shall be:~~

- i. ~~Studio 35m<sup>2</sup>~~
- ii. ~~1 Bedroom 45m<sup>2</sup>~~
- iii. ~~2 Bedroom 70m<sup>2</sup>~~
- iv. ~~3 or more Bedrooms 90m<sup>2</sup>~~

### 14.6.2.8 Windows to street

- a. Any residential unit facing the street must have a minimum of 20% of the street-facing facade in glazing. This can be in the form of windows or doors.
- b. For the purpose of this rule:
  - i. the area of a single gable facing the street shall not be included in the calculation of the street-facing facade, with the area of the gable, as per Figure 3 below, where the internal ceiling height is measured from the highest room:

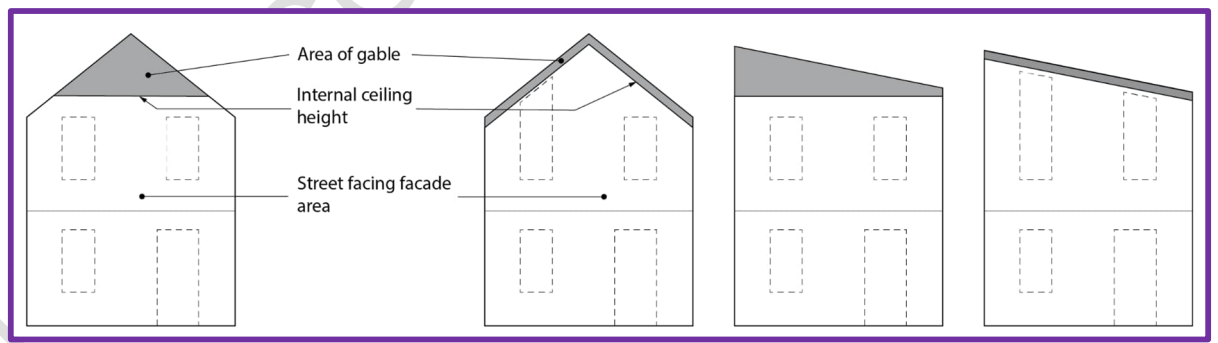

Figure 3: How to measure street facing gable Example of different buildings with front gables excluded from calculation

- c. Rule 14.6.2.8 a. and b. shall only apply to ~~the~~ a residential unit(s) with a street-facing facade within 12 metres of:
  - i. a road boundary, and/or;
  - ii. a road designation on the site;

where there are no other residential units with street-facing façades located between the subject residential unit(s) and the road boundary and/or road designation.

- d. Where units have a hinged front door facing the street with direct access to a residential unit (excluding a garage), the door may be counted toward the glazing requirement under a., up to a maximum of 2m<sup>2</sup>, regardless of whether it is glazed.
- e. Total required glazing for that residential unit may further be reduced to 15% (inclusive of the door area) provided that the residential unit has:
  - i. a hinged front door facing the street that has direct access to the residential unit (but not where this access is directly to a garage) there is at least 1m<sup>2</sup> of clear glazing with a sill height of no more than 1.2m above interior floor level from ground floor habitable room/s, in addition to any glazing in the hinged front door; and
  - ii. a ground floor habitable room with a transparent glazed window on the street facing facade with a minimum area of 1m<sup>2</sup> and a maximum still height of 1.2m (measured from the internal floor level) at least 20% of the ground floor street facing facade of residential units consist of glazing (inclusive of the hinged front door as described above).

#### 14.6.2.89 Ground floor habitable space room

- a. ~~Any residential unit fronting a road or public open space, unless built over an access way or another residential unit, shall have a habitable space located at ground level.~~
- b. ~~At least 30% of all residential units within a development shall have a habitable space located at ground level.~~
- c. ~~At least one habitable space located at the ground level of a residential unit shall have a minimum floor area of 12m<sup>2</sup> and a minimum internal dimension of 3 metres.~~
- a. Any building containing residential units shall:
  - i. where a residential unit fronts a road or public open space, unless built over another ground floor residential unit, have a habitable room located at ground level with minimum internal dimension of 3 metres. This rule does not apply to any upper-level residential unit that is built over a ground floor residential unit; and
  - ii. have at least 50% of any ground floor area as habitable rooms, except on sites where at least 25% of the building footprint is more than 4 storeys gross floor area of the building is at fifth floor level and above, which shall have at least 30% of any the ground floor area as habitable rooms.

#### 14.6.2.910 Outdoor living space

- a. A residential unit at ground floor level must have an outdoor living space that is at least 20 square metres and that comprises ground floor, balcony, patio, or roof terrace space that,—
  - i. where located at ground level, has no dimension less than 3 metres; and
  - ii. where provided in the form of a balcony, patio, or roof terrace, is at least 8 square metres and has a minimum dimension of 1.8 metres; and

- iii. is accessible from the residential unit; and
  - iv. may be
    - A. grouped cumulatively by area in 1 communally accessible location; or
    - B. located directly adjacent to the unit.
  - v. is free of buildings, parking spaces, and servicing and manoeuvring areas.
- b. A residential unit located above ground floor level must have an outdoor living space in the form of a balcony, patio, or roof terrace that—
- i. is at least 8 square metres and has a minimum dimension of 1.8 metres; and
  - ii. is accessible from the residential unit; and
  - iii. may be
    - A. grouped cumulatively by area in 1 communally accessible location, in which case it may be located at ground level; or
    - B. located directly adjacent to the unit.
- c. For residential studio units with an internal floor area exceeding 35m<sup>2</sup>, or single bedroom units with an internal floor area exceeding 45m<sup>2</sup>, the following outdoor living space areas apply:
- i. 15m<sup>2</sup> for residential units on the ground floor, with a minimum dimension of 3 metres; and
  - ii. 6m<sup>2</sup> for residential units above the ground floor, with a minimum dimension of 1.5 metres for of balconies, patios or roof terraces.
- a. ~~Each residential unit shall provide on site an outdoor living space of at least 24m<sup>2</sup>.~~
- b. ~~The required outdoor living space for each residential unit can be provided through a mix of private and communal areas, at the ground level or in balconies, provided that:~~
- ~~i. each residential unit shall have private outdoor living space of at least 8m<sup>2</sup> in total, not occupied by parking areas or access;~~
  - ~~ii. each private outdoor living space dimension shall be a minimum of 4 metres when provided at ground level and a minimum of 1.5 metres when provided by a balcony;~~
  - ~~iii. at least one private outdoor living space is to be directly accessible from a living area of that residential unit;~~
  - ~~iv. each outdoor living space provided as a communal space shall be accessible for use by all on-site residents and each dimension shall be a minimum of 4 metres;~~
  - ~~v. 50% of the outdoor living space required across the entire site shall be provided at ground level;~~
  - ~~vi. any communal space may be located indoors provided its use is explicitly for a recreation activity for the exclusive use of the residents of, and guests to the units on the site.~~

#### 14.6.2.101 ~~Service space, storage and waste management~~

- a. ~~Each residential unit shall be provided with at least 3m<sup>2</sup> of indoor or outdoor service space at ground floor level for the dedicated storage of waste and recycling bins.~~
- b. ~~The required service space for each residential unit shall be provided either individually, or within a dedicated shared communal space, but shall not be located between the road boundary and any habitable space.~~
- c. ~~Service space for the storage of waste and recycling bins shall be fully screened from any site, road and outdoor living space which adjoins the service space.~~
- a. For any development resulting in four or more residential units on a development site:
- i. each residential unit shall have at least 2.25m<sup>2</sup> of outdoor or indoor space at ground floor level for the dedicated storage of waste and recycling bins. This space shall have with a minimum dimension of 1.2 metres. Where located between a residential unit and the road boundary or access (pedestrian or vehicle) bins shall be screened by a solid fence with a minimum height of 1.2 metres;
  - ii. each ground floor residential unit shall have at least 3m<sup>2</sup> of dedicated outdoor space at ground floor level for washing lines. This space shall have a minimum dimension of 1.5 metres; and
  - iii. the required spaces in i. and/or ii. for each residential unit shall be provided either individually, or within a dedicated shared communal space. Any communal area shall be at least the sum total of the spaces required under (i) and (ii) for serviceable residential units.
- b. Each residential unit shall have covered and secure storage areas, (in addition to storage in kitchens, bathrooms, bedrooms, and the space set aside for car parking in garages (at a dimension of 5.5m deep, 3.1m wide, 2.4m high) with a minimum dimension of 600mm, to a total cumulative volume of:
- i. 6m<sup>3</sup> for one-bed units;
  - ii. 8m<sup>3</sup> for two-bedroom units; or
  - iii. 10m<sup>3</sup> for three-bedroom units or greater;
- with at least 50% of storage provided internal to the unit. The required storage shall be additional to any storage in the kitchen, bathroom/s and/or bedroom/s of the residential unit, and additional to the area dedicated to car parking in any garage which for the purpose of this rule is deemed to be an area 5.5m deep, 3.1m wide and 2.4m high, per garage.

#### 14.6.2.112 ~~Minimum site density from development and redevelopment of residential units~~ **Building coverage**

- a. The maximum building coverage must not exceed 50% of the net site area;

- i. Any eaves and roof overhangs up to 300mm in width and guttering up to 26500mm in total cumulative width from the wall of a building shall not be included in the building coverage calculation.
- ii. In addition to 14.6.2.12.a.i, a total site building coverage of up to 60% of the net site area is permitted when the following are met:
  - A. except where required under Chapter 7, where no on-site vehicle parking is provided;
  - B. a ground level communal outdoor living space shall be provided, with an area of to a scale of 10% of the development site area, with a minimum dimension of 8 metres;
  - C. a the minimum development site dimension of is 25m is achieved; and
  - D. at least 50% of the landscaping provided in compliance with 14.6.2.7 shall be shrubs.
- a. ~~The minimum residential site density to be achieved when a site is developed or redeveloped with a residential unit or units shall be not less than one residential unit for every complete 200m<sup>2</sup> of site area (e.g. a site area of 399m<sup>2</sup> requires 1 residential unit, a site area of 400m<sup>2</sup> requires 2 residential units).~~

#### 14.6.2.12~~3~~ Water supply for firefighting

- a.
